

Que 1. Which are the top three variables in your model which contribute most towards the probability of a lead getting converted?

Ans 1:

- **Total Time Spent on Website:**
 - The higher the time spent on the website, the higher the probability of the lead converting into a customer
- **Lead Source_Reference:**
 - If the source of the lead is a Reference, then there is a higher probability that the lead would convert.
- **What is your current occupation::**
 - If the lead is a working professional, then there is a higher probability that the lead would convert.

Que 2. What are the top 3 categorical/dummy variables in the model which should be focused the most on in order to increase the probability of lead conversion?

Ans 2:

- Lead Source_Reference
- Lead Source_Google
- Lead Source_Olark Chat

leads that have a higher chance of converting

Que 3. X Education has a period of 2 months every year during which they hire some interns. The sales team, in particular, has around 10 interns allotted to them. So, during this phase, they wish to make the lead conversion more aggressive. So, they want almost all of the potential leads (i.e., the customers who have been predicted as 1 by the model) to be converted and hence, want to make phone calls to as much of such people as possible. Suggest a good strategy they should employ at this stage.

Ans 3:

- Target leads that spend a lot of time on the X-Education site (Total Time Spent on Website)
- Target leads that have come through References as they have a higher probability of converting
- Target leads that repeatedly visit the site (Page Views Per Visit). They might be repeatedly visiting to compare courses from the other sites, as the number of visits might be for that reason. So the interns should be a bit more aggressive and should ensure competitive points where X-Education is better, are strictly highlighted.

Que 4. Similarly, at times, the company reaches its target for a quarter before the deadline. During this time, the company wants the sales team to focus on some new work as well. So, during this time, the company's aim is to not make phone calls unless it's extremely necessary, i.e., they want to minimize the rate of useless phone calls. Suggest a strategy they should employ at this stage.

Ans 4:

- Do not focus on businessmen as they are already engaged with their businesses.
- Do not focus on unemployed leads. They might not have a budget to spend on the course
- Do not focus on students, since they are already studying and would not be willing to enroll on a course specially designed for working professionals, so early in the tenure
